

Description

LA STANZA is inspired by the wealth of fine marble. It is a perfect mix of Italy and the rest of the world, of warm and cold colours, and of a well-known and an extremely rare product. Made of full-body porcelain stoneware, available in four colours and formats of 120x260 cm, 120x120 cm and 60x120 cm, all 6.5 mm thick, LA STANZA is suitable for both flooring and wall cladding applications. There are two surface finishes: one version is a full lapped gloss finish, and the other is a natural finish whose originality stems from the various light refractions in its surface.
